OL® Connect

Say Hello to Capture OnTheGo

Simone Wolf
General Manager OL Italy

Founded 1995 in Montréal, Canada

Why Improve business communication with customers

What Creating business documents and automating related processes, multichannel output and Capture solutions

How By using print, web, email and smart devices in a way that they adapt to the demands of any kind of company or organisation.

www.objectiflune.com/it/company/aboutus

Did you know that…?

80%

of corporate printing is related to transactions*

* Data Capture in Transportation and Logistics, Manufacturing Insights, an IDC Company

Paradoxically…

80%

of printing in business is based on forms that are originally electronically designed.*

* www.nashua.co.za/services, 2014

Paper forms are **an obstacle** for our field force, such as sales teams, insurance agents, maintenance, delivery, etc.

Paper, widely used and necessary, is associated with inefficiencies:

- Paper implies manual processing that may cause errors and additional costs:
  - Filling in forms on the spot
  - Return forms for processing
  - Scanning
  - Re-entry
  - Archiving issues
- Paper is rigid and prone to loss or alteration, namely during transport and manipulation

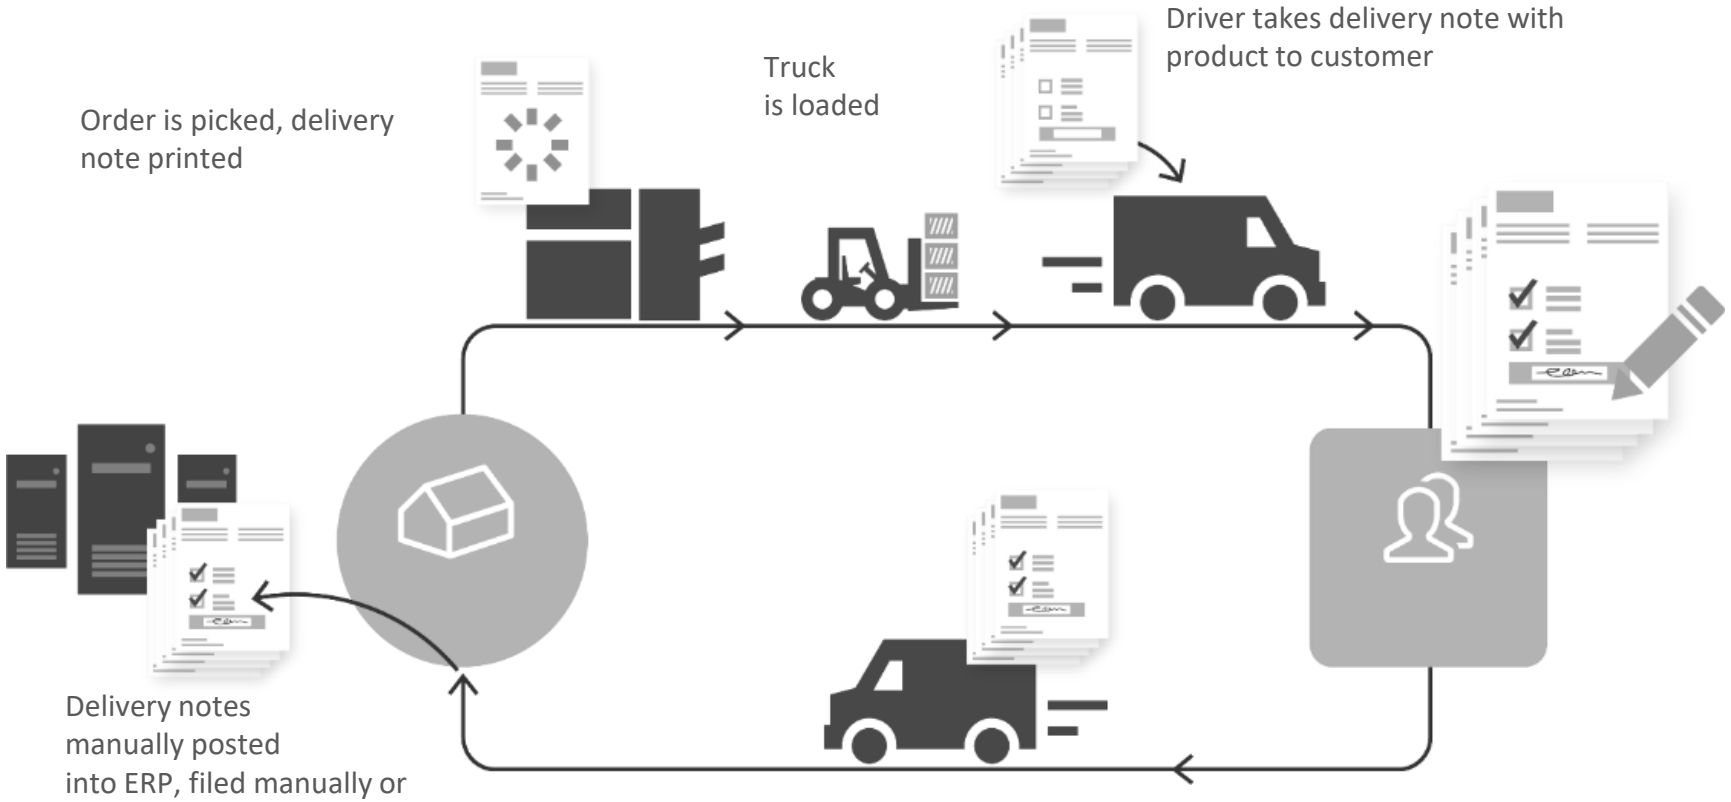
This is why we created

Capture OnTheGo

A solution designed for the management of field force automation.

SAY HELLO!
Capture
OnTheGo
OL™ Software

The Current Process



Now with Capture OnTheGo

Meanwhile, back at the office

Publish to ECM workflow

Communicate with the customer and the office

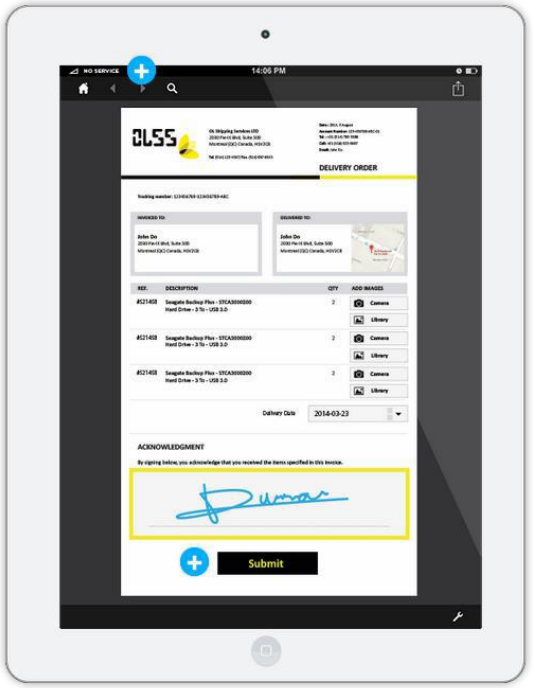
- ✓ Send an email to the customer with a copy of the signed note and other interesting information
- ✓ Send an SMS for delivery confirmation

Automate matching

And if the internet fails?

An Internet connection is not mandatory thanks to the offline mode

Documents and forms are immediately sent when an Internet connection becomes available.



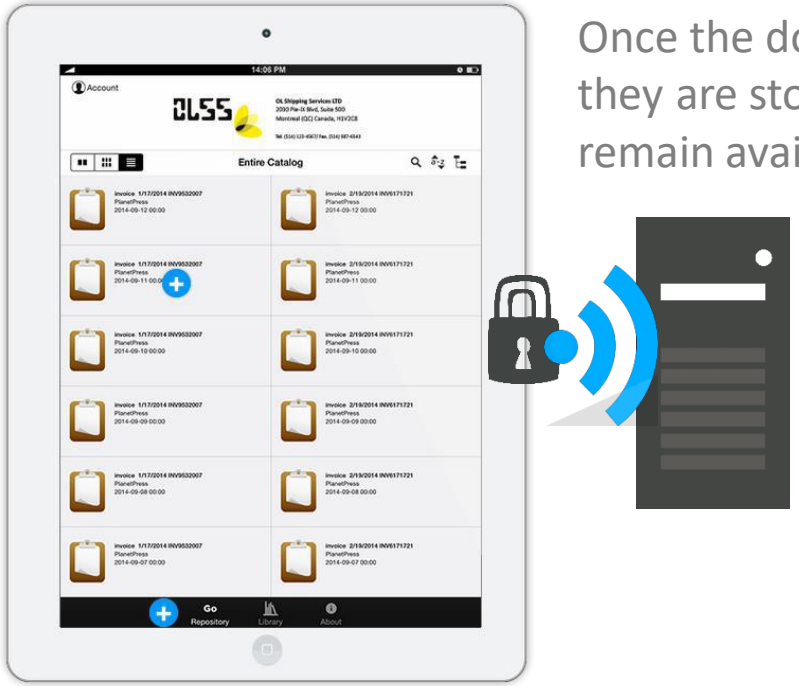
Documents and forms can be filled in and queued for submission, even when the device is offline.

What about data security?

Document sharing is GDPR compliant and secure

The list of documents and forms available for download is sent to the mobile device.

Each user or group of users can only access the content that is relevant and for which they are authorized.

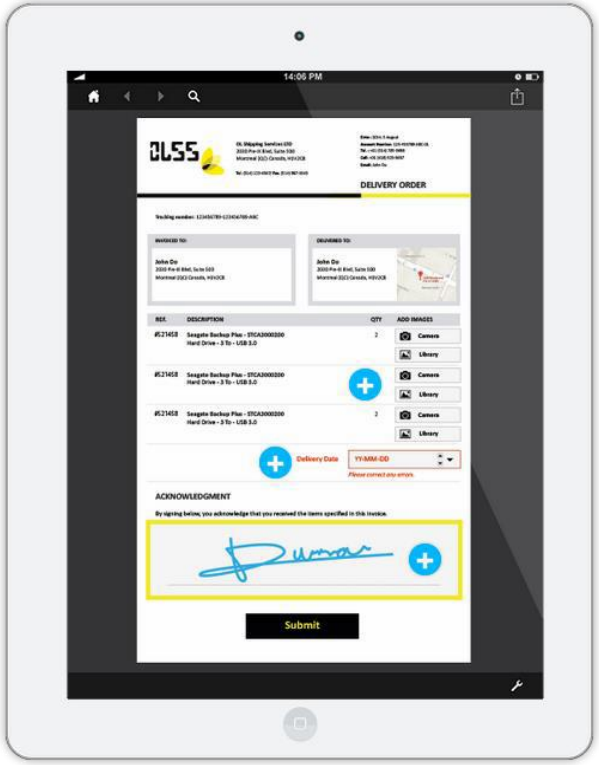


Once the documents are downloaded, they are stored in the user‘s library and remain available even when offline.

Include Multimedia Content

Your Data can take any shape

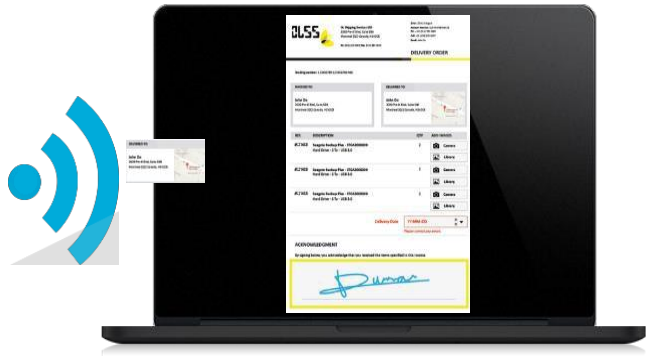
Add any relevant information such as images, signatures, handwritten notes and geo-localisation coordinates.



Shrink the Size of Your Data Transfer

Keep your bandwidth and accelerate your data transfer

Only the captured data has to be transferred – not the whole form.



The Workflow

Connect

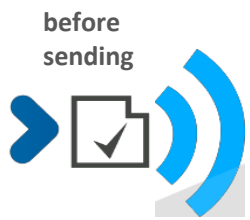
Design your html forms and use data from any of your systems

Design

Distribute them to people on the field

Enhance your documents with geo-localization data (GPS), handwritten notes and photos

Validate before sending



Capture and save data as soon as it arrives and generate processes

Capture

Re-send your data to your systems securely

You will see the difference

- Your database is updated in real time, at the same time your processes are initiated
- Your clients enjoy a better service
- You benefit from a better archiving quality
