“Security is an illusion, but it is a pleasant one”
James Rozoff (American author)

An abstract graphic on the left side of the slide. It features a dark blue background with a grid of thin lines. Overlaid on this are several white and red circuit-like lines that branch out. Scattered throughout are numerous small squares, some in white and some in red, some of which are slightly tilted. The overall effect is that of a complex, digital or network-based structure.

How can your business benefit from uniFLOW?

How can your business benefit from uniFLOW?

Control and reduce costs

Increase document security

Improve employee productivity

Help save the environment

How can you Business benefit from uniFLOW?

Control and reduce Costs

- Key features that facilitate significant cost reduction
 - Creation of intelligent printing rules
 - Integrated cost tracking and accounting
 - Reduction of IT overheads by rolling out just one printer driver for your entire device fleet

How can you Business benefit from uniFLOW?

Increase Document Security

- Key features behind increased document security
 - Secured print release
 - Device function control
 - Integrated device management
 - Device auditing using Canon iW SAM Express

How can you Business benefit from uniFLOW?

Improve Employee Productivity

- **Key features improving business productivity**
 - Automated document processing
 - Print from anywhere
 - Users can release their print jobs at any printer

How can you Business benefit from uniFLOW?

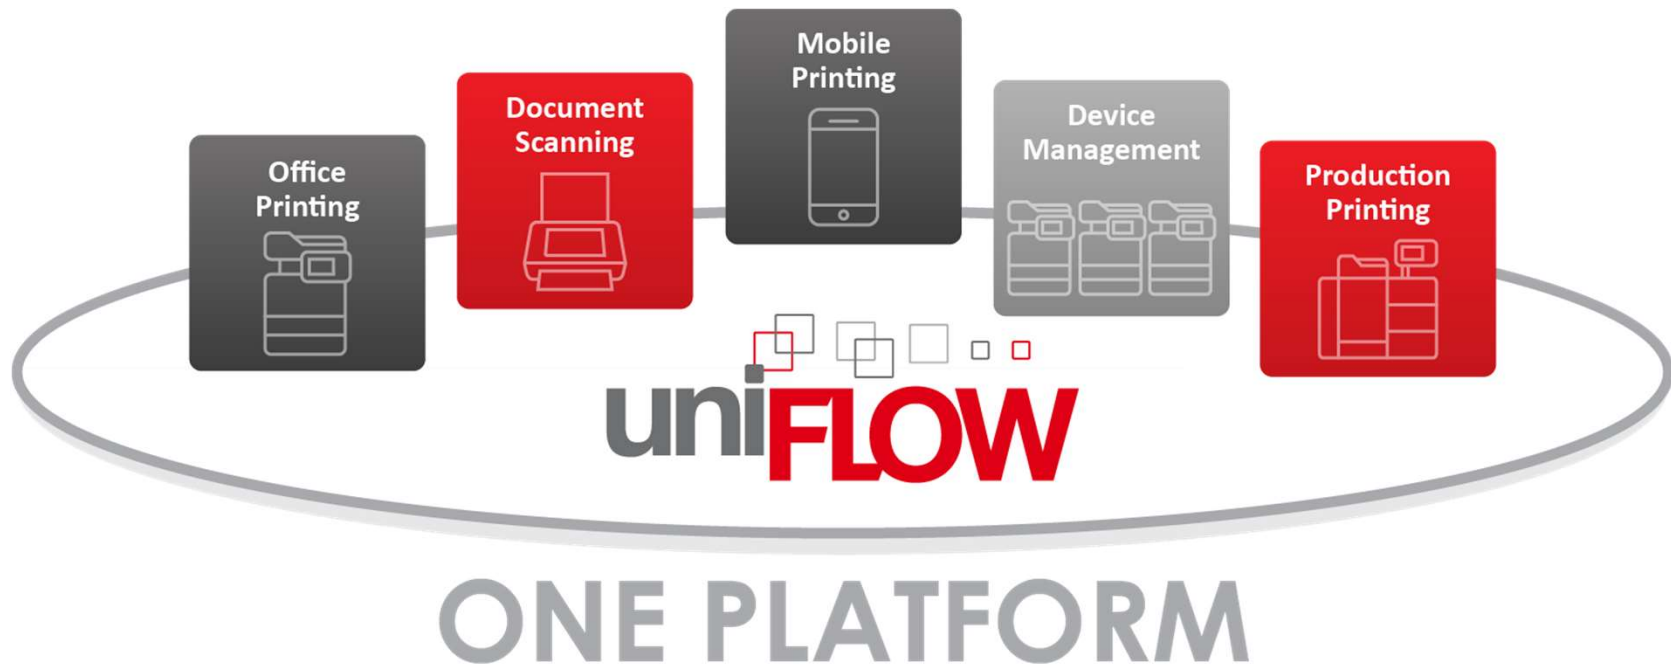

Help save the Environment

- Key features that have a positive effect on the environment
 - Implement print policies

uniFLOW – One Platform Solution

An abstract digital graphic on a dark blue background. It features a complex network of white and red lines, resembling a circuit board or data flow. The lines are interconnected, with some forming circular patterns. Scattered throughout are numerous small squares, some in red and some in white, some of which are slightly tilted. The overall composition is dynamic and technical, suggesting a focus on technology or data processing.

Ok, but what if I don't
have or want to invest on a server?

Could we get a Simple, Serverless and Secured solution?

Rising of the Cloud

71%

of enterprises plan to grow public cloud spend by more than 20 percent in the next year.

38%

of enterprises see public cloud as their top priority.

96%

of enterprises are using cloud services.

TRANSFORMATION

Why hosting printing and scanning?

- **Help reduce Costs for Infrastructure**
 - Save costs on server hardware, OS licensing and associated cost
- **Reduce Costs for System Maintenance**
 - Infrastructure and software updates are taken care of by host provider
- **Highly scalable**
 - Cloud systems can be easily scaled up according to changing needs
- **Help save the Environment**
 - Reduce power consumption of the print and scan infrastructure

Unique technologies which make the difference

- **Part of the Canon Portfolio**
 - Perfectly complements Canon multifunctional devices
- **Device-integrated Management**
 - Adding Canon devices can be initiated directly from the device
- **Cloud-based Infrastructure**
 - All configuration and management takes place in the cloud
 - No local servers have to be purchased, maintained or managed

uniFLOW Online – Simple. Serverless. Secure.

Public cloud-based solution for secure printing/ scanning & cost tracking, enabling businesses to manage their print and scan environment...

Flexible authentication

Secure Printing

Print from cloud

Mobile Printing

Document scanning

Cost tracking

TRANSFORMATION

Access securely to your private space on device

• Flexible Authentication

- Maintain device security by requiring the user to login before gaining access to the device or selected device functions
- Multiple options for authentication

Release your print jobs easily on any device

- Print Confidential Documents Securely
- Print jobs remain in the user's personal secure print queue and will follow the user so they can be released on any printer connected to uniFLOW Online within a user's location

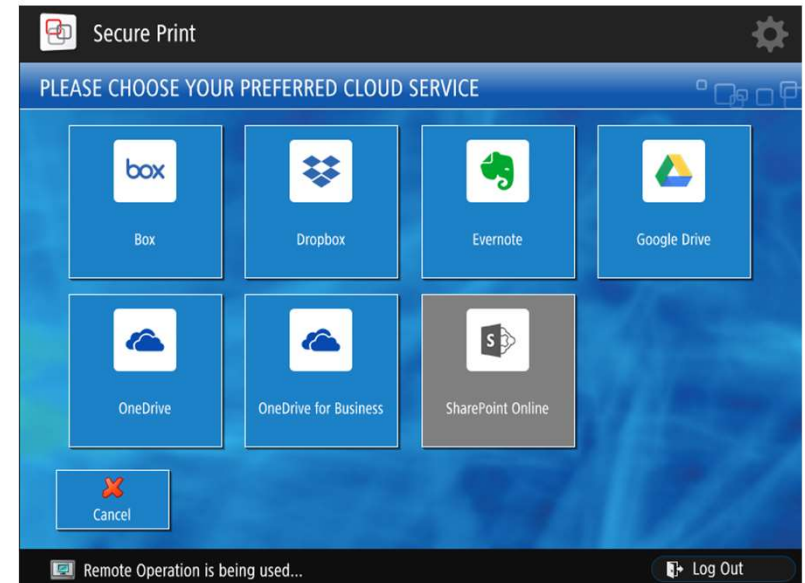

Retrieve and print your docs stored in the cloud

• Print documents from Cloud

• Print from connected cloud services

- Box
- Dropbox
- Evernote®
- Google Drive™
- OneDrive®/ OneDrive® for Business
- SharePoint® Online

Use your mobile devices to submit jobs

- Send Print Jobs from Anywhere
- Send print jobs from anywhere, regardless of location
 - Submission via email (for registered users or guests)
 - Send print jobs directly via the uniFLOW Online tenant
- Jobs are converted in the cloud

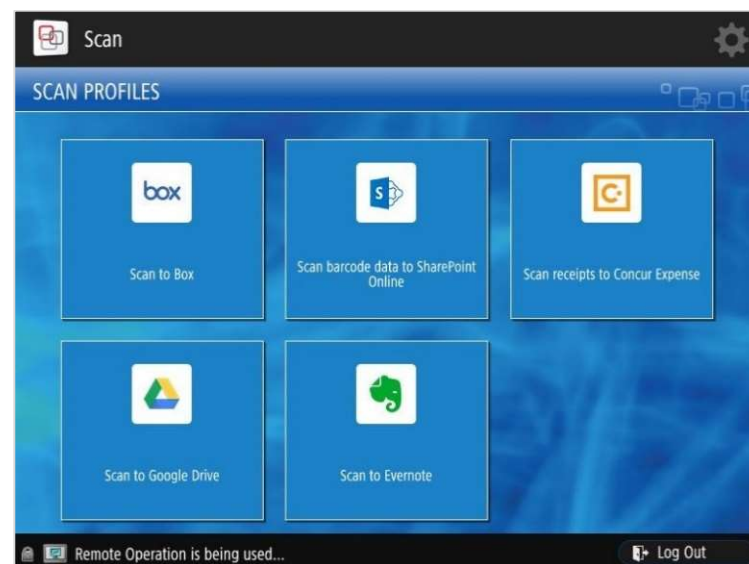

Send docs to your favorite cloud destination

• Secure Document Scanning

• Available cloud scan destinations:

- Scan to Myself
- Box
- Concur®
- Dropbox
- Evernote®
- Google Drive™,
- OneDrive®
- OneDrive® for Business
- SharePoint® Online

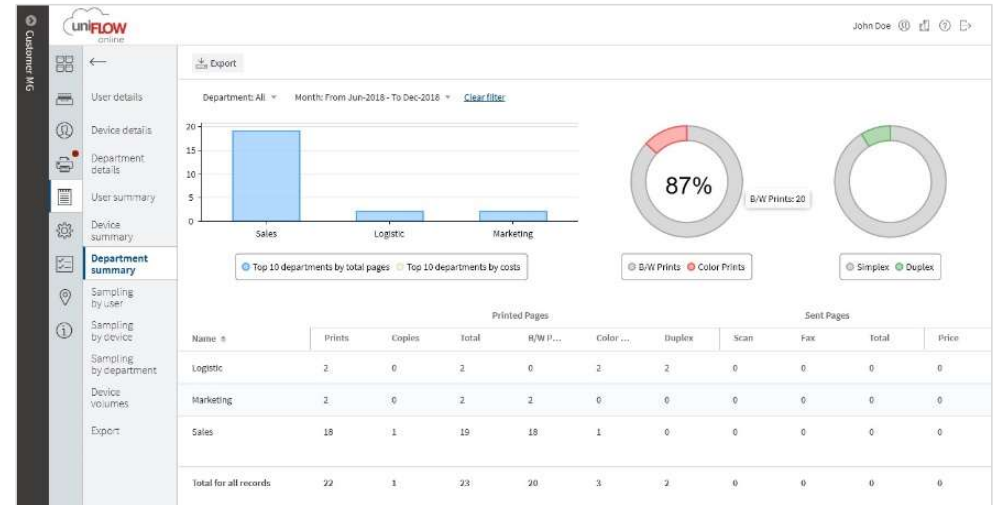

Keep control of the usage

Track Print, Scan, Copy and Fax Costs

- Easily generate graphical reports
 - User details
 - Device details
 - Department details
 - Locations details

Supervise activity and monitor your fleet

The screenshot displays the uniFLOW online dashboard interface. The top navigation bar includes the user name 'Mary Gelhaus' and a 'Dashboard' dropdown menu. The left sidebar lists various management options: Dashboard, Start Printing, User, Print / Scan, Reports, Settings, Tasks, Locations, and Legal Notice.

About system security with uniFLOW Online?

„Does my print job go to the cloud?“

“How does user authentication and password storage work?“

“What user and print job information is stored in the cloud?“

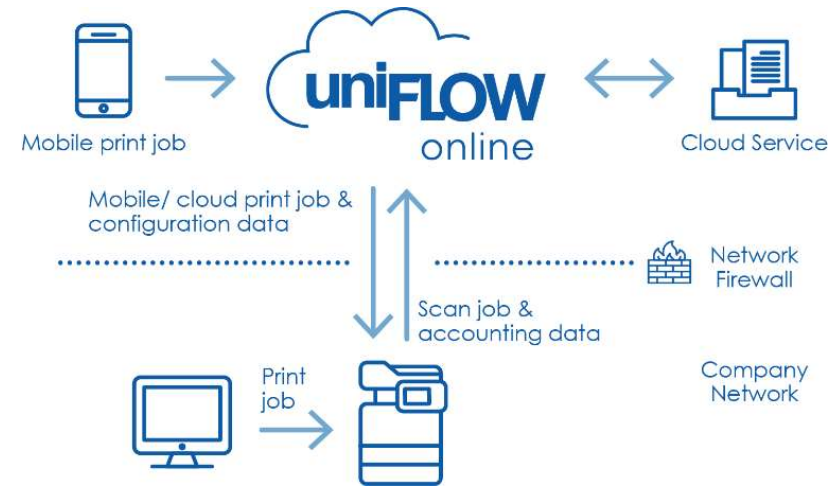

“Where is my data stored?“

System Security is always maintained

- Regionally hosted on Microsoft Azure™ data centers
- Print jobs stay local
- Multiple identity providers
- Only accounting data stored in uniFLOW Online

Profit from Day One

 **Avoiding Data Breaches and Misuse**
Restrict device access to authorized personnel only

 **Keep confidential Documents secure**
Users print using personal secure print queues

 **Improve Office Productivity**
Users can easily print securely and from mobile devices
Users can scan directly from any connected Canon imageRUNNER ADVANCE

Profit from Day One

Gain Control over your Costs

Make costs visible and allocate to users, devices or departments

Increased Security while saving Costs

Removes servers without compromising performance or security

Reduce the environmental Impact

Print out only what is needed and reduce power consumption

uniFLOW Online – Simple. Serverless. Secure.

The answer to today's challenges to reduce IT overheads, improve productivity and increase security

- Start from now to take full control of your printing fleet without any investment and save money on their usage
- Propose new advanced services to your users while maintaining high level of security inside your company
