Colour engineered to impress

Canon's upgraded colour technology helps users maximise the impact of their documents and printed materials, delivering bold, striking hues that grab attention. The LBP610 series has been designed to ensure quality without compromise, promising vibrant, punchy colours time and time again. Sales memos, marketing brochures, or just simple internal communications can now be faithfully reproduced, with impressive accuracy and solid colours that truly resonate.

Maximise business mobility

Growing businesses need to remain agile and productive, and that's why mobile printing is crucial. The LBP610 series offers users maximum mobile compatibility, with AirPrint (Apple) and Mopria (Android) support as standard. In addition, the Wireless Direct connection, which enables guests to print without the need for network access, provides even greater flexibility and agility, while addressing security concerns too. And the Canon PRINT Business mobile application furthers the LBP610 series mobile credentials, delivering a range of useful features designed to support mobile working.

Productivity-boosting print speeds

Thanks to its brand-new engine, the LBP610 series offers impressive print speeds across both colour and black & white settings. Capable of delivering up to 18 pages per minute, LBP610 series promises a reassuringly rapid performance, allowing businesses to remain productive and efficient, with duplex printing also possible on the LBP613Cdw. And all the while, the same consistently high quality is guaranteed every time.

More printing, less maintenance

The LBP610 series has been built to help businesses do what they do best, and spend less time worrying about upkeep. Thanks to new high-yield cartridge options, users won't be disrupted by replacing consumables as often. And when the times comes to install a new cartridge, it's easier than ever, thanks to the auto toner seal removal system. LBP610 series printers also allow for remote consumable monitoring through a simple user interface (accessible via a PC or mobile device), giving small businesses the ability to more efficiently plan their consumable stocking and upkeep intervals.

Security as standard

Document security is a concern for businesses of all sizes, particularly for SMEs who often don't benefit from the same dedicated IT resources as enterprise counterparts. The LBP610 series solves this problem with its PIN document release system, giving users greater control over confidential materials. This feature eradicates potential issues over multiple staff using the same printer, and provides peace of mind for management.
